

Meaning of traits.

Data: Average of the three scores in the "data" section of the survey (collection, cleaning, analysis).
Visualization: Average of the three scores in the "visualization" section of the survey ("design", "storytelling", "building").
Society: Average of the three scores in the "society" section of the survey ("leadership", "community", "management").

Which are the 5 countries with more members?

Most members of the society are from the top 5 of countries with most representation, in particular, almost half of the memberships are from the United States of America. The members from this top 5 countries (but Australia) that joined during the first week of the society, currently represent a fifth of the society.

Total traits proportion.

Each petal represents each trait and their size is proportional to the proportion of dominant traits within the membership.
